Studentpreneur Awareness Program

The Studentpreneur Awareness Program is a program initiated by Startup Nagaland, Department of Industries and Commerce in collaboration with the Young Indians and Confederation of Indian Industry. This program serves as a catalyst for inspiring a new generation of entrepreneurs among college students. By inviting startups and entrepreneurs as panelists, the program provides a platform for sharing insights, experiences, and encouragement regarding entrepreneurship. Emphasizing the importance of venturing into the entrepreneurial realm rather than solely relying on government jobs, the program aims to instill a mindset of innovation and job creation among students. Through engaging discussions and motivational talks, students are encouraged to explore the vast opportunities in entrepreneurship, with the ultimate goal of driving positive societal change and fostering economic growth through job creation.
